EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Persson (Reg. 41,248) on 7-14-05.

The application has been amended as follows:

Claim 24, Line 15, change "said decomposed binary image;" to read --at least one of said decomposed binary images;--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: claims 4, 8-15, and 18-26 are allowed because, the prior art of record specifically Zhao et al. (US 6,243,480) and Knox (US 5,734,752) does not teach embedding information data into a printing data by *replacing complex local portions* of at least one of said bit-planes with information data, printing the embedded image for printing and extracting the printed matter and said information data form the printed image of claim 4 and 15 combined with other features and elements of the claims; and scanning a printed matter which includes an information data, converting the scanned data into numerical data, representing said numerical data as pure binary code, decomposing said numerical data into a set of binary images, extracting said information data from at least one of

said decomposed binary images of claim 24 combined with other features and elements of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other prior art cited

3. Prior art of record cited and not relied upon is considered pertinent to applicant's disclosure.

The US Patent 6,886,750; US Patent 6,731,788; US Patent Application 20040071312; US Patent 6,580,804 and US 6,215,421 variously teach embedding of data into image specifically related to applicant's invention as claimed.
